 Problem or acne-prone skin conditions show signs of enlarged pores, shiny-oily surface, “break-outs”, and severe inflammation. Many over-the-counter skin remedies only work to dry up problem areas, often leaving already sensitive skin feeling sore and irritated.

The unique features of Dermaclear Lotion’s effective skin-clearing formula, are the superior anti-inflammatory skin soothing ingredients that synergistically work to *clear and calm* - resulting in a balanced, healthy skin.

Bacocalmine© is an extract of the Bacopa monniera plant, one of the primary anti-stress herbs of the Ayurvedic healing system. Among its many beneficial properties, Bacocalmine© helps protect skin from free radicals and attack from oxidizing agents, with superb antibacterial and anti-fungal effects. BV-OSC ® is a stable oil-soluble Vitamin C ester with excellent percutaneous absorption.

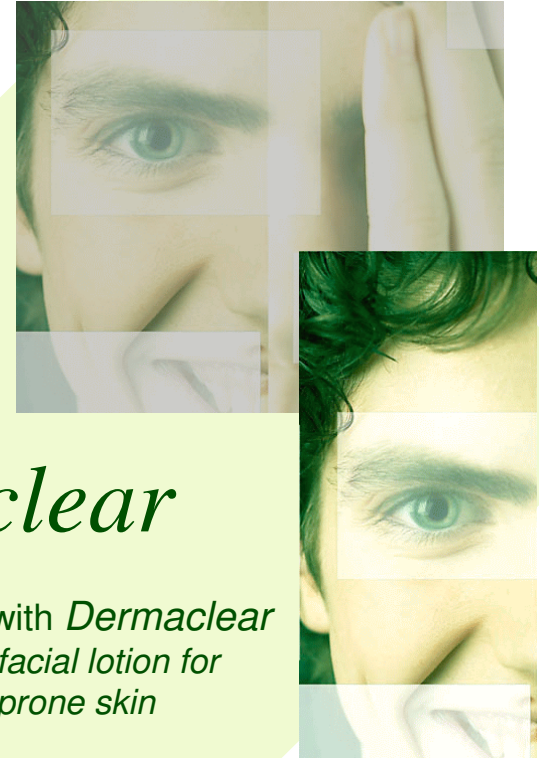

Increasing this formula’s effectiveness, Evermat © reduces sebum secretions, leaving skin with tighter pores and a smoother, matte surface. Added as a most valuable ingredient, UGL© is a calming skin exfoliator, enhancing skin luminosity and clarity. Phyto-active plant extracts of Gotu Kola, Green Tea, Calendula and Aloe Barbadensis, further enhance the powerful antioxidant, skin healing effects of Dermaclear Lotion.

Recommended use:

Morning and evening, cleanse face with Sea Dew Soap Free Cleanser, rinse well, and then apply a small amount of Dermaclear Lotion to face and problem areas. For those with dry or combination skin, top with C-Serum. To help re-balance extremely dry skin conditions, apply a moisture Masque in the evening, two or three times a week. For *Inside-Out Skin Care Maintenance*, use in combination with Dermaclear Capsules.
